

**Felixstowe Men's Shed  
Firs Residential Home Project**

The project was to convert a day room into an Art Deco style lounge with a bar to encourage the dementia patients to recall memories

The bar was designed and constructed from scratch by members

The corridor leading to the lounge was brick papered to give the impression of walking down the lane to the Pewit Lounge

The finished room, papered, decorated and with the finished bar

The opening in September 2019
